

- Compatible with 36" wide xerographic printers
- Compact footprint
- Offloads up to 600 scanned originals and 600 prints
- Stacks 11" x 17" to 44" x 60" documents
- Automatically adjusts to scan and print speed of KIP, Seiko or Ricoh wide format copier
- Adjustable height
- Eliminates awkward retrieval of prints
- Provides efficiency in production scanning and printing environments
- Improves operator functionality
- Improves online operation from multiple workstations
- Enables printing of multi-page print sets

PrintStack Tandem is the stacking solution for digital xerographic copiers. It is ruggedly constructed for reliable, automatic retrieval of original documents and duplicate prints in production environments. Additional floor space necessary for the PrintStack Tandem is kept to a minimum due to its compact size making it the perfect printer accessory in any office environment.

Providing Productivity

Improve the efficiency and productivity of your current or new copier by adding a PrintStack Tandem. Forget having to catch or dodge originals or copies as they exit the scanner/copier. PrintStack Tandem provides easy offloading of prints and originals without interfering with feeding and handling of original documents. Prints remain crisp and neat after exiting your scanner or copier, and the operator is able to concentrate on the scanning or copying process increasing productivity dramatically. PrintStack Tandem also improves online operation from multiple user workstations by providing a sturdy place to stack multiple jobs that have been run to an unattended printer allowing users to retrieve prints at their convenience.

- How will prints be handled as they exit your printer?
- Who is responsible for collecting and distributing prints when more than one person is printing at the same time?
- How often will engineers or managers have to wait for prints to exit?
- How do you or will you keep the prints in order?

PrintStack Tandem is the simple offloading solution for copying or scanning wide format engineering, architectural or other technical documents.

Extending Productivity

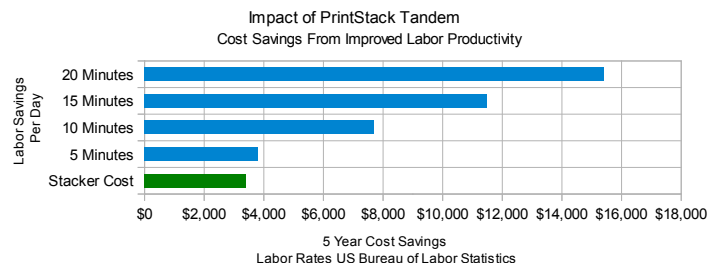

Multi-page print sets can be sent from your desktop, printed, and stacked without concern that the offloader is unable to handle the capacity. Prints remain crisp and neat after exiting your printer, copier or scanner.

- Are your prints sequenced in sets? Do you print several sets simultaneously? Would you like to have sets neatly stacked so they can be removed at the user's convenience?
- Do you ever need the printer to run continuously?
- Do you have reason to print/copy overnight and stack prints for retrieval the next morning?
- Would the ability to stack sets of prints offer savings in time, money and frustration?

PrintStack Tandem provides streamlined online printing that just makes sense.

Benefits of Productivity

An increase in productivity that saves as little as 5 minutes per day will more than pay for the stacker over the life of the printer. With a PrintStack Tandem stacker, you can save up to 20 minutes per day through increased productivity.

PrintStack Tandem Wide Format Stacking Solution

Ergonomic

The stacker's solid construction eases frustrations by easily managing a large capacity of original and copied documents. Tameran's PrintStack eliminates the necessity to retrieve prints from the bottom of printers as well as disorganized stacks that eventually end up on the floor due to the small offload capacities of most wide format printers. Potential occupational safety issues are eliminated when prints are available to users at a convenient waist-high level.

Specifications	
Media Size	A to E (A4 to A0) (11" minimum length)*
Copy/Print Orientation	Face up
Scanned Original Orientation	Same as fed
Printer Print Sequence	Bottom up
Scanner Print Sequence	First to last
Media Types	Bond, vellum, tracing paper, film
Capacity	Up to 600 20 lb. bond sheets, any size
Standby	When connected to active power outlet, green LED indicates standby mode
Operation	Input sensor automatically starts stacking operation when first sheet arrives and automatically returns to standby after last sheet is stacked
Mobility	Four (4) swivel casters allow easy positioning to the printer for rollaway
Power Consumption	Standby 6 watts Stacking 22 watts
Installation Specifications	
Weight	120 lb. (54 kg)
Dimensions	Width 50" (1270 mm) Depth 31" (787 mm), 21" (533 mm) extension Overall Height 2" (51 mm) higher than scanner exit height Printer Sheet Acceptance Height Adjustable at installation from 25" (635 mm) to 41.5" (1054 mm)
Power Supply	Input Voltage 100-240 VAC Input Frequency 47-63 Hz Output Voltage 24 VDC Output Current .63 Amps Max Safety UL, CUL, CE
Electrical Receptacle	USA/Canada 115 VAC, single phase standard, 15 Amp receptacle NEMA 15R International 100-240 VAC, Local receptacle
Environment	Temperature 60° to 80° F (15°-27° C) Relative Humidity 20% to 80% R.H.
Noise	Equivalent continuous A weighted sound pressure 52.3 db(A)
Certifications	UL, CE, FCC Class B

*KIP 7100 minimum original media length is 12"
